ADVANTAGES :

- Positioned in an emerging growth corridor
Mittermari is in Bagepalli Taluk, Chikkaballapur district. The wider Chikkaballapur region is being developed as an industrial and infrastructure corridor, with Karnataka's official investment portal listing Bagepalli (Hosudya) Industrial Area – 809.31 acres among the district's industrial land banks.
- Bagepalli has strong highway connectivity
Bagepalli lies on the NH-44 Bengaluru–Hyderabad corridor, giving the area an important regional connection toward Bengaluru and Andhra Pradesh. This is one of the key reasons the location can have longer-term development potential.
- Industrial development can support future demand
A proposed 822.18-acre Bagepalli Industrial Area covering Hosahudya and Kondareddypalle is currently reported at the conceptual/planning stage. It is intended to support medium and small-scale industries and associated infrastructure. This should be treated as a future development opportunity, not as an already-completed project.
- Mittermari already has infrastructure connectivity
Government records also document a transmission-line project connecting Gowribidanuru to a 220/66 KV substation at Mittermari, indicating established regional power infrastructure
- North Bengaluru has been experiencing enormous growth and development due to the area's proximity to the airport and the government is aggressively promoting this region as the epicentre of economic activities
- Recent news about the Bagepalli industrial area includes the renaming of the town to Bhagyanagara, the potential for significant investment with 1,500 acres of land offered to Korean industries, and the development of nearby projects like the Emmvee Bagepalli Solar PV Park and the Utopiaa farmland project. These developments highlight the area's growing economic importance
- Space City - Bengaluru is all set to witness a Disneyland inspired "Space City" spread across 1,600 acres. With an investment of Rs.18,500 crore at Bagepalli in the Chikballapur district, it will be the first of its kind in the country. It will generate employment for 20,000 people
- Construction of ITIR [Information Technology Investment Region] - This is the largest IT region in India spread across 12,000 acres and expected to create 3 million job opportunities.
- Devanahalli Business Park - Spread across 400 plus acres is expected to attract an investment of 2.2 billion dollars and create 2.5 lakh jobs.
- Airport connectivity - Government of Karnataka has initiated the development of Peripheral Ring Road (PRR), Intermediate Ring Road (IRR), Satellite Towns Ring Road (STRR) and Bengaluru High-Speed Rail Link (HSRL) which will significantly improve connectivity to different parts of Bengaluru and airport which inturn will improve the connectivity to North Bengaluru.
- Wider NH44 - The National Highway Authority of India (NHAI) is in the process of widening the existing NH-44, from the existing 6-lanes to 10-lanes, which can sustain higher traffic flow.
